Climate Change and Real Estate

4 hrs. CE, course #34034

\$40

Natural disasters have become a significant factor underlying mortgage default. This class is designed to help the real estate professional understand the threats that drought, wildfires, floods, hurricanes, and sea level rise pose to clients buying real property. Further, we will discuss what the best available science and data indicate regarding the link between these threats and climate change. While real estate agents are not be expected to be scientific experts, this course will help them direct their clients to critical public data sources.

Deadline

Register by 9/25/19 After deadline, add \$5 to registration fee
